CAREER OBJECTIVE

As a Software Developer with more than 6 years of experience and proficiency in Full Stack Development with framework and technologies such as C#, React.js, Oracle, MySQL, MS-SQL, Java, and 6 months in Vue.js, PHP, .Net Core as my final year project. I have a strong willingness to learn and possess a dedicated work ethic. Having finished numerous freelancing projects as well, I am looking to obtain experience as a Software Developer which I hope to gain within your organization where I can showcase my skills for both your benefit and my professional development.

TECHNICAL SKILLS

Programming Languages:	C#, React framework, MSSQL, ASP.Net Core, Dynamics 365, Microsoft Azure, PHP, MySQL, MVC, Bootstrap, PL-SQL(T-SQL), Database (Oracle), Vue.Js, Java 8+, HTML, CSS, JavaScript (JS), Mongo DB.
Computer Programs/Technologies:	Jira, Microsoft Teams, Slack, Confluence, cPanel, GitHub, Plesk, Struts 2, WinSCP, Putty, Microsoft Office.

EDUCATION

Professional Year

Performance Education, Melbourne, Australia

March 2021 – March 2022

Key Learnings: Accelerating Interview Success (AIS), Professional Workplace Communication (PWC), Internship Preparation (IP), Australian Job Search Skills (AJS).

Achievements – Successfully completed all the course in a timely manner.

Master of Information Technology

Royal Melbourne Institute of Technology University, Melbourne, Australia

February 2018 – December 2019

Key Learnings: Software and System Architecture and its Design and implementation, MVC Models, Agile SCRUM Methodology, Cloud Security, Secure E-Commerce, Database Concepts, Big Data Processing, IT Infrastructure and Security, Project Management, Algorithm and Analysis.

Achievements – Finished master's with Distinction and Secured High Distinction (HD) in Final Year Project.

Bachelor of Computer Engineering

University of Mumbai, India

June 2012 – June 2016

Key Learnings: OOPS Concepts and its methodology, Cryptography and System Security, Artificial Intelligence, Data Warehouse and Mining, Data Structure, Distributed Database, Computer graphics, Operating systems, Web development, Software Engineering.

Achievements – Presented 2 technical papers at national level organized by IETE and 1 CSI paper organized by CSI in our university.

UNIVERSITY PROJECTS

I- Continue Donation Web application.

Royal Melbourne Institute of Technology University, Melbourne.

Objective:	To develop the MVP of the Donation Website as per the requirements given by the client.
Tools:	Visual Studio Code, MySQL Workbench, IntelliJ IDEA, Eclipse IDE, Amazon EC2.
Duties:	I was responsible for frontend and creation and management of the database, later also investigated and developed a small part in Backend of the project.
Outcome:	Successfully delivered the MVP to the client, fulfilling all the task before deadlines. Learned new programming languages like Vue.js and .Net Core and Framework.
Result:	Obtained High Distinction mark for this project.

Application Server Load Balancer.

University of Mumbai, India.

Objective:	To develop a load balancer which maintains and redirects the upcoming loads to the available application server, if an application server is loaded full.
-------------------	---

Tools: *Ubuntu OS, Apache as an Application Server.*

Duties: *I was responsible for designing the load balancer which redirects the excess load on the application server.*

Outcome: *Successfully designed and presented the application server which balances the load and sends the upcoming request on the server with less load and keeps the availability of all the servers high.*

Result: *Was announced as the best Final Year project in the College.*

PROFESSIONAL EXPERIENCE

Software Engineer

October 2020 – Present

TallyGroup, Melbourne, Australia

- Reporting to Team lead on daily basis to discuss the progress on task assigned and having face-to-face once a week to discuss the personal growth to ensure if one is doing good in the environment, they work in.
- Hands-on experience using Microsoft Dynamics 365 with experience in building CRM and managing different entities involved in the business logic.
- Contributing to the current TallyIt Billing Software to do Continuous Improvement (CI) and fixing the bugs and errors.
- Developing the new functionality in every sprint in timely manner to continuously add to the current software in agile approach.
- Technologies learned: C#, HTML, CSS, JavaScript, React.js, .Net Core, Azure Services.
- Successfully finished 1 project and currently working on TallyIt Billing Software for continuous development.

Freelance Software Developer

March 2019 – October 2020

Melbourne and Sydney, Australia

- **DConnect** - CRM based web application with sending Email Campaign, Data Record and Data Integration features. Applications help in making a marketing journey and send emails with the help of CRON jobs based on their status. This product is developed in PHP, HTML, CSS, JavaScript, and MySQL as Database. With API integration of SendGrid for mails.
- **DManage** - This project involved integration of all three i.e., HR management solutions, employee onboarding, Time clock and rostering system based on the roles of the User. Its developed using ASP.Net Core (MVC Framework), React, HTML, CSS and MySQL as Database.
- **DCovid** - COVID Safe Web App used to record people visiting a place so that they can be tracked in case of an outbreak. People data being recorded and maintained considering all GDPR policy. This web app is built using PHP, HTML, CSS, JavaScript, and MySQL as Database.

Front End Developer Intern (Unpaid)

April 2020 - September 2020

CyQIQ, Melbourne, Australia

- Daily scrum, Wrap-up meetings and a Weekly Scrum meeting which takes place once in a week.
- Reported to the manager on the daily basis regarding the progress of the task assigned.
- Working on the Website re-development of CyQIQ with agile approach with passion of completing all the task on priority basis mentioned in product backlog.
- Technologies learned: WordPress, HTML, CSS, JavaScript, React, ASP.Net Core.
- Was involved in two different projects in my tenure.
- Working as a Full stack Developer more than a soul Front End Developer. This helps me improve my knowledge and experience all-round from development to deployment and support.
- Working in a team of 4 developers with everyone primarily focusing on different goals to work collectively in a team and efficiently release the website for the stakeholders before the deadline.

Software Engineer

August 2016 - December 2017

In-Solutions Global Pvt Ltd., Mumbai, India

- Managed 6 different Banking domain projects. With Client Onsite visit and problem-solving experience as well.
- Worked on 4 live projects and made 2 projects live during my tenure. My job roles include designing, coding, testing, configure, support and documenting all the steps taken in the process to develop and deliver the application.
- Check and supervise day-to-day reports and manage different transactions. Developed a system using the stored procedures, some automated script that operates on a particular time in the day, functions in database and various ETL operations to

perform various tasks. Co-ordination with the UX/UI developers to maintain the design of the application.

- Effectively communicated with the project manager, operations, clients and other project teams about project progress, development, activities, and goals.
- Completed daily report cross verification which is generated from the operations team and giving a go-ahead to the team.
- Reported to project manager on day-to-day basis.

***Achievement** - Successfully developed the requirements coming on daily basis in the live projects and made 2 projects go live and delivered the project before the timeline.*

PERSONAL ATTRIBUTES

- **Communication Skill** - Strong presentation skills, when presenting final year engineering project 'Application Server Load Balancer' to industry panel, received positive feedback on my ability to convey technical information in an accessible manner. Achieved high marks for all university written assignments, including a high distinction for a Web Application.
- **Problem-Solving attitude** – During my tenure at In-Solutions Global Pvt Ltd., I was able to identify and define problems, analyze problems to find causes, evaluate possible and quality solutions, consider the possible outcomes of each solution, decide on the best solution and implement it. All the solutions provided sounds judgmental to the customers.
- **Team Player** – As a student, I have always worked effectively in a team, contribute to team objectives, communicate effectively with team members, respect, listen to and encourage team members, pitch in, put the success of the team ahead of individual success.
- **Flexibility** – As a manager at Criniti's Italian restaurant, I was able to handle the changes and I was able to turn around a negative working environment and develop a very supportive team.
